t [ps]
colours: blue CREM, green measured
Applies to the Para-Positronium class:
events classified here = 0, with a CREM collapse time = 0
λ = 7990.9± 1.7 us^-1
dotted: τexp = 125.14± 0.026623 ps
Al-Ramadhan & Gidley, PRL 72 (1994)
Classical inspiral and quantum annihilation are
different processes; this sets the scale.
