colours: blue CREM, green measured
Applies to the Ortho-Positronium class:
events classified here = 0, with a CREM collapse time = 0
λ = 7.0404 ± 0.0013 us^-1
dotted: τexp = 142.04 ± 0.025836 ns
Vallery et al., PRL 90 (2003)
Classical inspiral and quantum annihilation are
different processes; this sets the scale.
