Capture cross section e+e- → Ps (classical radiative capture)
captures 774 of 1000; max captured b 4.44e+03 pm; σb 60 pm
solid: classical radiative capture ΔEdipole > E (audit 394)
dashed: Kramers, one photon above E (aPs, RyPs)
Kotelnikov & Milstein, Phys. Scr. 94, 055403 (2019)
no measurement of free e+ on free e-
σcapture [barn]
