t [ns]

colours: blue CREM, green measured

Applies to the Ortho-Positronium class:

events classified here = 60, with a CREM collapse time = 0

$\lambda = 7.0404 \pm 0.0013 \text{ us}^{-1}$

dotted: $\tau_{\text{exp}} = 142.04 \pm 0.025836 \text{ ns}$

Vallery et al., PRL 90 (2003)

Classical inspiral and quantum annihilation are

different processes; this sets the scale.
